

Escape2Explore - Titan Email to Google Workspace Migration Guide

Goal: Move all existing Titan Email accounts and emails to Google Workspace without losing mail.

Phase 1 - Purchase Google Workspace

1. Visit workspace.google.com and click Get Started.
2. Business Name: Escape2Explore.
3. Employees: 2-9.
4. Region: India.
5. Choose 'I have a domain I can use'.
6. Enter domain: escape2explore.com.
7. Create admin account: admin@escape2explore.com.

Phase 2 - Verify Domain

1. Google provides a TXT record beginning with `google-site-verification=...`
2. Add the TXT record in your DNS management panel.
3. Save and click Verify in Google Workspace.

Phase 3 - Create Users

Create these users in Google Workspace:

sales@escape2explore.com
kishor@escape2explore.com
aftab@escape2explore.com
admin@escape2explore.com
saniya@escape2explore.com
swamy@escape2explore.com
sonu@escape2explore.com
manu@escape2explore.com
info@escape2explore.com

Phase 4 - Migrate Existing Titan Emails

Google Admin Console → Data Migration → Email → Other IMAP Server.

IMAP Server: `imap.titan.email`

Port: 993

Security: SSL

Migrate each mailbox using its Titan credentials.

Phase 5 - Verify Migration

Check Inbox, Sent, Drafts, and folders in Gmail for all users.

Phase 6 - Change MX Records

Replace Titan MX records with Google MX records:

`ASPMX.L.GOOGLE.COM` (Priority 1)

`ALT1.ASPMX.L.GOOGLE.COM` (Priority 5)

`ALT2.ASPMX.L.GOOGLE.COM` (Priority 5)

`ALT3.ASPMX.L.GOOGLE.COM` (Priority 10)

`ALT4.ASPMX.L.GOOGLE.COM` (Priority 10)

Phase 7 - SPF, DKIM, DMARC

SPF: `v=spf1 include:_spf.google.com ~all`

Generate DKIM in Google Admin Console and add the TXT record.

DMARC: `v=DMARC1; p=quarantine; rua=mailto:admin@escape2explore.com`

Phase 8 - Final Testing

Test send/receive from Gmail and domain accounts. Keep Titan active for 7-14 days before cancelling.
